6. What are the risk factors?

Investment in collective investment schemes should be regarded as a medium to long term investment. The Equity Growth Fund will invest both directly and indirectly through investment vehicles which provide exposure to equities. The limitations arising from the size and illiquidity of some of the investments in which the Fund may invest, may create potential risks for investors, in that the manager may sometimes experience delays in liquidating assets in order to maintain the liquidity requirements of the Fund. When the Fund invests in other collective investment schemes and/or Exchange Traded Funds, it will be subject to the same risk factors as the underlying assets in which these schemes and Funds invest.

Past performance of investments is not necessarily a guide to future performance and the value of investments and of the currency in which they are denominated can go down as well as up and investors may not always get back their initial investment. In particular, deduction of the intial charge means that if investors withdraw from the investment in the short-term, they may not get back the amount they invested.

6. X'inħuma r-riskji?

Investimenti f'ċerti Fondi huma aktar suġġetti għal riskji partikolari li jinkludi espożizzjonijiet għar-riskju tal-munita minħabba li jistgħu jkunu esposti għal swieq li jkunu għadhom qeqħidin jiżv il-piaw, jew investimenti maħruja minn kumpaniji klassifikati non-investment grade.

Il-limitazzjonijiet li joħorġu mid-daqs u min-nuqqas ta' likwidità ta' wħud mill-investimenti fejn jinvesti dan il-Fond jistgħu joħolqu riskji għall-investituri għax il-maniġer jista' jdum ma jbigħ l-assi tiegħu biex jaqdi l-obbligazzjonijiet li jżomm il-likwidità meħtieġa għal kull Fond. Meta l-Fond jinvesti fi skemi oħra ta' investiment kollettiv, prodotti oħra b'investimenti mħaddma jew/u Exchange Traded Funds, dan għandu l-istess riskji li jkollhom l-investimenti li jkunu investew fihom.
