We assign a rating: an Environmental Rating (E), a Social Rating (S), a Governance Rating (G), and finally an Overall Portfolio's Rating (ESG).

The scale of rating ranges from 0 to 10, 10 being the best rating.

The overall rating is calculated based on the weight of the pillars E, S and G inherent in each sector according to our internal rating process.

The overall portfolio's ESG rating is the weighted average of the ESG ratings by the weight of each rated stock and each rated issuer of the portfolio. ESG rating of the investment universe is the weighted average ESG ratings by the weight of each rated stock and each rated issuer of the investment universe.

For more details on the portfolio, the methodologies used and the ESG approach, please refer to the transparency code by clicking [here](#).

Covered	1.4	0.96%
Media & Entertainment	2.5	0.60%
Banks	3.8	3.74%

Main industry sectors with high carbon intensity (4)

Industry Sector	Carbon Intensity	Weight
Materials	726.5	0.93%
Utilities	207.5	8.11%
Pharmaceuticals, Biotechnology & Life Sciences	168.4	0.57%
Real Estate	125.4	2.65%
Industry	76.1	6.02%

The Carbon Intensity corresponds to the volume of CO₂ emitted for 1 million dollars of turnover achieved. To calculate this intensity, we take into account not only the direct emissions related to the company's operations (Scope 1) but also those related to the supply of the necessary energy (Scope 2).

Company Carbon Intensity (tons of CO₂/USD M of turnover) = (Scope 1 + Scope 2) / USD M of turnover

Scope 1: Greenhouse gas emissions generated from burning fossil fuels and production processes which are owned or controlled by the company

Scope 2: Greenhouse gas emissions from consumption of energy by the company

The overall carbon portfolio's intensity is the sum of the firm's carbon intensities multiplied by the amounts held in the portfolio divided by the sum of amounts held with carbon intensities. Carbon data is provided by **Trucost**, a leader in carbon and environmental risk and data analysis and a subsidiary of S&P Dow Jones Indices.

Investment Objective

The subfund's investment objective is to maximise a performance corresponding to an investment with a moderate exposure to equity market risk over a recommended investment period of at least 3 years. This investment is made by selecting securities of companies or countries selected for their good environmental, social, governmental practices and financial quality. The long-term strategic allocation is composed of 30% equities and 70% international bonds with a euro bias. This subfund promotes environmental or social characteristics (Article 8 of Regulation (EU) 2019/2088 known as Sustainable Finance Disclosure (SFDR)).

HRIF - SRI Moderate is actively managed without reference to a benchmark.

HRIF - SRI Moderate is a profiled subfund within a multi-asset SRI range composed of several profiles. With a strategic allocation consisting of 30% equities on average, it constitutes an investment with a moderate exposure to equity market risk.

The subfund's sources of performance are the tactical allocation of asset classes, the selection of securities meeting non-financial and financial criteria, the active management of interest rate risk and credit risk, and the active management of currency risk.

The SRI selection is done using a best-in-class approach and consists in assigning an SRI score according to ESG criteria by classifying the stocks into quartiles within each sector. Stocks in the top two quartiles have no restrictions, those in the third quartile are limited to 15%, and those in the bottom quartile are excluded. Up to 10% of the subfund's holdings may consist of stocks not rated according to ESG criteria.

This subfund has adopted the AFG/FIR/Eurosif Transparency Code for SRI UCIs open to the public. This Transparency Code is available on the Management Company's website.

Stock of the Month

KINGSPAN

Kingspan (KSP) is an Irish company which is involved in the business of manufacturing high-performance insulation and building envelope solutions. Its products and solutions enable energy efficient future proofed buildings, which optimise natural resources and promote well-being.

With more than 212 manufacturing sites and 22,000 employees, KSP has a diverse geographical presence in ~80 countries. In FY24, the group generated €8.6bn in revenue and reported NP of €0.7bn.

Environmental Pillar

In the Environmental pillar (40% of the rating), company scores higher, at 7.0 vs 5.6 for the sector. KSP's "Planet Passionate", its environmental sustainability programme, lists its sustainability initiatives, goals, and progress. Group has committed to 1.5°C SBTi goal with i) ~65% reduction in Scope 1+2 emissions by 2030, ii) 15% reduction in carbon intensity of raw materials, iii) ISO 50001 Energy management system for all large sites, iv) 60% renewable energy consumption by 2030.

89% of operations are from lower carbon intensive business lines vs its peers. In FY24, the group was able to achieve 61% reduction in Scope 1+2 emissions and 3.9% reduction in carbon intensity of key raw materials. Further, it was able to achieve following FY30 targets in advance i.e. ~20% renewable on-site electricity generation, 60% renewable energy consumption and 1bn PET recycled into internal manufacturing operations. 57% of its owned sites are equipped with solar PV systems.

Kingspan's insulation products help in attracting growth opportunities in clean technologies. We note that it derives revenues from insulated panels and other materials which support energy efficiency for buildings (EU Taxonomy aligned turnover was 40% in FY24 vs 42% in FY23) and plans to develop systems which address climate change.

In FY24, KSP completed 30 energy efficiency projects which includes Canovelles heat recovery project, 100% renewable energy consumption at a new facility at Hagetmau site, laminator efficiency at Euroclad etc. Though we find no evidence of toxic emission targets at KSP, the company has set waste reduction target of zero waste to landfill by FY30 (FY24: ~7,088 tonnes, ~14.5% yoy reduction of waste to landfill). The group is not involved in any environmental controversy in FY24.

Social Pillar

In the Social pillar (30% of the rating), company scores lower, at 3.2 vs 5.3 for the sector. KSP's labour management practices are relatively average as compared to its peers with it higher proportion of its operations are present in labour intensive business lines.

Moreover, the company has recorded an ~18% yoy increase in its workforce in FY24 (~47% rise vs FY19), which exposes the co. to staff integration and retention challenges. We find limited evidence of initiatives to minimise impact of layoffs (FY24 turnover rate: 17.8%).

85% of KSP's operations are from business lines which are prone to injuries & fatalities and has poor safety parameters vs peers. It reported a case of fatality from an accident at its facility in FY24. FY23 also recorded a fatality which is an area of concern with regards to efficacy of H&S system. Only 84% employees are covered under the framework. Total recordable accident rate increased to ~12.9/mn hrs in FY24 vs. ~11.0 in FY23.

KSP is involved in a moderate social controversy in FY24. The group is being investigated by NLRB into alleged anti-union activities in California, US following a complaint made by international workers association of sheet metal, air, rail, and transportation. The investigation remains ongoing and thereby creates a drag on its social pillar assessment.

Governance Pillar

In the Governance pillar (30% of the rating), company scores higher, at 7.9 vs 5.8 for the sector. Kingspan has a unitary board structure. Its BOD consists of 36% women, while 55% are independent. It has segregated the roles of CEO and Chairperson. All of BOD committees including Audit & Compliance, Nomination & Governance and Remuneration are fully independent enabling KSP to be leading in governance practices vs peers. 10% weight on achievement of ESG targets in director remuneration.

The group has a comprehensive anti-fraud, bribery and corruption policy which includes fraud risk assessments, 3rd party due diligence and consistent communication & training to ensure compliance. All of its relevant employees receive mandatory training on anti-bribery & corruption policy once in 2 years. KSP rolled out targeted training on the policy to all of its employees identified as high risk. In FY24, Kingspan did not report any case of violation of anti-bribery policy.

KSP has a confidential independent hotline which encourages employees to raise concerns on working environment and business practices. In FY24, KSP rolled out SHREDD policy, which ensures suppliers adhere to high standards of human rights, ethical standards, and responsible practices. However, KSP ranks lower vs industry avg. in corporate behaviour practices given its substantial number of operations are in regions which are perceived to have high levels of corruption.

KSP is involved in a severe controversy in FY24. KSP and two other insulation suppliers was alleged to have used construction materials in refurbishment of Grenfell Tower which were combustible in nature and contributed to the fire resulting in deaths of 72 people and injury to 70 others. Though the investigation concluded KSP was not directly responsible for the fire, but it was alleged to have misled the safety nature of its material (which failed fire tests). Police inquiry ongoing.

With an overall ESG score of 6.13, Kingspan is eligible for our fund. This good ESG score comes mainly from the good scores obtained on the E and G pillars.

Issue of the Month

STORA ENSO

Stora Enso is a Finnish-Swedish company based in Helsinki that positions itself as one of the world's leading producers of wood-based solutions. It specializes in the manufacture of paper, packaging, biomaterials, and wood-based building solutions, with a strong focus on sustainability and innovation to replace fossil-based materials. With approximately 25,000 employees, Stora Enso generated revenues of €10.5 billion in 2024.

Furthermore, it is one of the largest private forest owners in the world, which gives it privileged access to sustainable resources. Stora Enso's activities are organized into several segments: packaging materials, packaging solutions, biomaterials, wood products, forest management, and paper production.

The company operates primarily in Europe, where it generates approximately 58% of its revenue, but also has operations in Asia, South America, and North America. The company stands out for its ability to innovate and adapt to market trends, particularly in responding to the growing demand for sustainable solutions.

Despite the challenges of capacity closures due to the structural decline in paper demand, Stora Enso continues to strengthen its leadership position in other markets thanks to its diversification and expertise in sustainable forest management. The vertical integration of its operations also allows Stora Enso to cope with a certain degree of volatility in the selling prices of its products in an intensely competitive environment.

Regarding the current operating environment, the short-term outlook is mixed as demand for Stora Enso products appears to be stabilizing at the bottom of the cycle while wood costs remain elevated. More positively, margins are expected to remain stable or even slowly improve, thanks to a gradual adaptation of prices to higher costs and the company's cost-cutting actions.

Additionally, cash flow generation will be supported next year by a decrease in investments. Finally, despite weak credit metrics within its BBB- rating, the company plans to sell 12% of its Swedish forestry assets to defend its rating, which provides some comfort regarding its commitment to a conservative financial policy and a robust balance sheet.

Environmental Pillar

Environmentally (40% of the score), Stora Enso is well positioned, with an environmental management policy and commitments covering all of its operations. The group's carbon intensity is 22% lower than industry average. As most of its paper products manufacturing operations are sourced from its own forestry operations, the group is committed to preserving biodiversity and wildlife habitats, with regular impact studies.

The manufacturing of paper and packaging products results in high water consumption. Stora monitors the associated risks but does not appear to use alternative water sources. Furthermore, toxic emissions and waste are controlled, notably through ISO 14001 certification or equivalent and regular environmental audits conducted across all locations of operations.

Social Pillar

In terms of social/societal performance (40% of the score), Stora Enso is slightly above the industry average. The group is making efforts to mitigate the impact of restructuring on employees, particularly through severance pay and outplacement assistance.

Furthermore, non-salary benefits exist but do not appear to cover all staff, nor include all possible schemes such as pensions and retirement, but only share allocations. Positively, Stora Enso conducts engagement surveys to gauge staff satisfaction.

Governance Pillar

In terms of governance (20% of the score), Stora Enso is significantly above the industry average. The independence of the members of the Board of Directors is largely ensured, and the roles of Chairman of the Board, himself independent, and Chief Executive Officer are clearly distinct. Women are well represented, at 44% on the Board of Directors. The Board does include an independent audit committee, but the pay committee is not independent.

The group's compensation practices were also the subject of negative votes in 2024. On the ethical front, the group has a detailed anti-corruption policy and ensures the protection of whistleblowers. Permanent employees benefit from training on ethical standards. Furthermore, shareholder rights appear to be well respected.

Stora Enso is eligible for our fund thanks to its excellent environmental practices and good scores on the S and G pillars. It should be noted that two controversies dating back to 2024 are still ongoing. One relates to alleged damage to reverber in Finland and the other concerns the alleged occupation of lands in Brazil for eucalyptus plantation.

A minor controversy over alleged employee dismissals in Finland was also concluded in January 2025.

Fund Manager Commentary

Economic Environment

While the implementation of the Trump administration's new tariff policy was postponed to early April, Europe set the pace for capital markets in March with 2 plans that echo Mr. Draghi's "whatever it takes" during the Eurozone crisis.

The activity surveys for March (purchasing managers) point to weakness in the manufacturing sector in the United States, while the service component surprised to the upside. In Europe, the momentum is improving in the manufacturing sector, which nevertheless remains in contraction territory, and service activities are less dynamic than expected.

Over the month, global equity markets posted a rather sharp fall, down 7.6% in euros. The US stock market is still underperforming other markets and fell quite heavily, weakened by its exposure to Growth stocks, including the technology, telecommunications and consumer durables sectors. European equities are proving more resilient and only shed around 3%.

In bond markets, the focus was on the historic fiscal policy change in Germany. While 10-year yields on US treasury bonds were stable at 4.2% in March, 10-year sovereign rates in Germany rose by 30 basis points to 2.7%, impacting all Eurozone fixed income markets.

ESG-Climate Analysis

Integrating extra-financial criteria into stock-picking resulted in significantly higher exposure to ESG criteria than in the investment universe (6.67 vs. 6.05). The lead is most marked in the E (7.33 vs. 6.2) pillar. The fund has a smaller carbon footprint than its investment universe.

Performance & current holdings

Performance was negative in absolute terms and lower than that of the investment universe. Our reduced equity exposure during the month compared to the benchmark index had a positive impact on relative performance. Our selection of European stocks had a negative contribution to the fund's relative performance.

The sector allocation contributed positively to the fund's relative performance due to overexposure to insurance, food distribution and utilities, as well as underexposure to consumer durables and semiconductors. Negative contributions came from overexposure to real estate and underexposure to energy and capital goods.

Our stock selection had a negative contribution to the fund's relative performance, particularly in banking (AIB, Bawag, Erste), capital goods (Metso, Schneider, Kingspan, weapon exclusion), specialty retail (Inditex), consumer durables (Kering), basic materials (CRH), pharmaceuticals (Merck, Gerresheimer), and media (Publicis).

Positive contributions came from professional services (Relx), financial services (Deutsche Boerse), food retail (Kesko), healthcare equipment (Fresenius), transportation (DHL), and telecoms (Elisa, KPN). International diversification had a negative impact on absolute performance. However, we successfully reduced our exposure to overweight European equities. On the bond side, the absolute and relative contribution was negative. We increased bond sensitivity following the pressure on German interest rates.

Outlook

We expect a moderate slowdown in US activity in 2025, while other developed economies should see their economy stabilise, or recover gradually, particularly the Eurozone and China. However, uncertainty generated by tensions between the United States and its main trading partners has risen significantly in recent weeks and could put a stop to the global growth momentum.

Considering the moderate slowdown in global growth, poor political visibility, and central banks pursuing their rate cutting cycles, we have maintained a modest positive stance on sovereign yields and cautious exposure to riskier assets.

For illustrative purpose only, the fund manager commentary and analysis are a global view of the recent evolution of the economic conditions. This is a support which does not constitute neither an investment advice nor a recommendation to buy or sell investment. This commentary is not the result of investment research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and is not subject to any prohibition on dealing ahead of its dissemination. Any forecast, projection or target where provided is indicative only and is not guaranteed in any way. HSBC Global Asset Management (France) accepts no liability for any failure to meet such forecast, projection or target.

Important Information

Document can be intended for non professional investors as defined by MIFID

The material contained herein is for information only and does not constitute investment advice or a recommendation to any reader of this material to buy or sell investments. There are risks involved with this type of investment. Investors and potential investors should read and note the risk warnings in the prospectus and relevant Key Investor Information Document (KIID). Past performance of investments is not necessarily a guide to future performance and the value of investments and any income from them can go down as well as up and you may not get back the amount you originally invested. The rate of currency exchange, where applicable, may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in established markets. You should view this investment as medium to long-term, and should plan to keep it for at least three years.

HSBC Responsible Investment Funds (the Funds) are marketed in Malta in terms of the Directive on Undertakings for Collective Investment Schemes in Transferable Securities (UCITS). All applications are made on the basis of the relevant and current Fund prospectus, the KIID of the related Fund and the most recent annual and semi-annual reports (when available), which can be obtained upon request free of charge from HSBC Bank Malta p.l.c which is licensed to conduct Investment Services business by the Malta Financial Services Authority.

The Funds are manufactured by HSBC Global Asset Management (France) (the Portfolio Management Company) - RCS n°421 345 489 (Nanterre). The Portfolio Management Company is authorised by the French regulatory body AMF (n° GP-99026). Postal address: 75419 Paris cedex 08. Offices: Immeuble cœur Défense - 110, esplanade du Général de Gaulle - La Défense 4 - France. The Portfolio Management Company has appointed HSBC Global Asset Management (Malta) Ltd, 80 Mill Street, Qormi, QRM 3101 as the Distributor of the Fund with the right to appoint sub-distributors. In Malta, the Funds are distributed to Investors through HSBC Bank Malta p.l.c. (a sub-distributor of HSBC Global Asset Management (Malta) Ltd).

Approved and issued by HSBC Global Asset Management (Malta) Ltd, Business Banking Centre, 80, Mill Street, Qormi QRM 3101. Company Reg No: C26053 which is licensed to provide investment services in Malta by the Malta Financial Services Authority under the Investment Services Act.
