

HSBC Global Funds II ICAV

Euro Fixed Term Bond 2028

Marketing communication | Monthly report 28 February 2025 | Share class AD

Investment objective

The Fund aims to provide capital growth and income during the term of the Fund.

Investment strategy

The Fund is actively managed without reference to a benchmark.

The Fund will promote environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund primarily invests in euro denominated investment grade and non-investment grade bonds, will invest minimum of 70% in euro denominated fixed and floating rate bonds issued by corporate issuers in developed markets and up to 30% in fixed or floating rate bonds issued by corporate issuers that are rated non-investment grade at the time of purchase.

The Fund may invest up to 20% in euro denominated bonds which are issued by governments, government agencies and supranational bodies in developed markets.

The Fund will invest in bonds with a final maturity date which expected to end on or around 18 December 2028 (the Term Date). The portfolio may hold up to 100% of its assets in cash and cash equivalents.

The Fund includes the identification and analysis of an issuer's ESG Credentials as an integral part of the investment decision making process and will not invest in bonds issued by companies involved in specific excluded activities, such as, tobacco and controversial weapons.

The Fund may invest up to 10% in other funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.

MSCI ESG Score	ESG score	E	S	G
Fund	7.0	7.2	5.3	6.0
Reference benchmark	7.0	7.2	5.1	5.9

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Past performance does not predict future returns. The figures are calculated in the share class base currency, dividend reinvested, net of fees.
